Software Engineer

A Software Engineer committed to continual learning and evolution. I remain updated with the latest trends in web programming and actively integrate these advancements into my projects for hands-on experience.

EXPERIENCE

Shayan Pardazesh, Mashhad — *Software Engineer*

Shayan Pardazesh is a leading platform specializing in freight and logistics services, connecting clients with reliable cargo solutions.

◎ Laravel for robust backend operations

◎ Eloquent ORM for efficient database interactions

◎ Core PHP to ensure customization and flexibility

◎ Blade templates for dynamic frontend rendering

◎ For styling, I relied on SASS to deliver unique and responsive designs.

Satrex, Mashhad —*Software Engineer*

Satrex is a platform dedicated to job search and listings.

I played a pivotal role in shaping its technical infrastructure and in introducing Vue.js components. During the project, I utilized the following tools and technologies:

◎ VueX for state management

 ◎ Vuetify for UI/UX design

◎ Core Vue.js coupled with Vue Material Design

◎ Crafted bespoke designs utilizing SASS and Vue styled-components

◎ Backend operations powered by PHP and MYSQL.

Alfateam, Mashhad — *Software Engineer*

I was instrumental in forging the technical backbone of the project, especially in seamlessly integrating PHP functionalities. Over the course of the assignment, I leveraged the following frameworks and tools:

SKILLS

JavaScript, PHP,
Bootstrap,
Laravel,Java,Python
TypeScript, HTML
MYSQL,Postgresql
Redis, vuejs, vuex
Git, Dockering

LANGUAGES

Persian (Native), English

◉ Laravel for robust backend operations

◉ Eloquent ORM for efficient database interactions

◉ Core PHP to ensure customization and flexibility

◉ Blade templates for dynamic frontend rendering

◉ For styling, I relied on SASS to deliver unique and responsive designs.

EDUCATION

Montazeri Technical College, Mashhad — Associate's degree

2011 - 2013

Computer Software
